

accompanying DEIS assessed the environmental and socioeconomic impacts associated with each alternative.

Substantive public and agency comments were received on the draft document during the 60-day comment period that ended on July 10, 1995. Most comments focused on the following issues: changes proposed for State Route 85; the range of alternatives and suggestions for new alternatives; costs associated with implementing various elements of alternatives; and mitigation strategies for the protection of natural resources, especially threatened and endangered species. Based on an analysis of these comments, the National Park Service has determined that a supplemental draft GMP/EIS will be prepared.

The supplemental draft GMP/EIS will address the comments and suggestions received during the initial public comment period. The supplement will include clarifications of the original alternatives and a discussion of new alternatives to be added since release of the initial draft GMP/EIS. It will also present an analysis of the environmental consequences associated with each alternative.

The official who is responsible for the current GMP/EIA planning process is Stanley T. Albright, Field Director, Pacific West Area, National Park Service. The supplemental draft GMP/EIS is expected to be available for public review in early 1996, and it will be provided to all persons and organizations who received the initial DEIS. Upon approval, officials responsible for implementing the plan will be the Superintendent, Organ Pipe Cactus National Monument, and the Field Director, Intermountain Field Area, National Park Service.

Dated: December 12, 1995.

Bureau of Reclamation

Change in Discount Rate for Water Resources Planning

AGENCY: Bureau of Reclamation, Interior.

ACTION: Notice of change.

SUMMARY: The Water Resources Planning Act of 1965 and the Water Resources Development Act of 1974 require an annual determination of a discount rate for Federal water resources planning. The discount rate for Federal water resources planning for fiscal year 1996 is 7.625 percent. Discounting is to be used to convert future monetary values to present values.

DATES: This discount rate is to be used for the period October 1, 1995, through and including September 30, 1996.

FOR FURTHER INFORMATION CONTACT: Mr. Larry Schluntz, Economist, Reclamation Law, Contracts, and Repayment Office, Bureau of Reclamation, Attention: D-5200, Building 67, Denver Federal Center, Denver CO 80225-0007; telephone: (303) 236-1061, extension 287.

SUPPLEMENTARY INFORMATION: Notice is hereby given that the interest rate to be used by Federal agencies in the formulation and evaluation of plans for water and related land resources is 7.625 percent for fiscal year 1996.

This rate has been computed in accordance with Section 80(a), Pub. L. 93-251 (88 Stat. 34) and 18 CFR 704.39, which: (1) Specify that the rate shall be based upon the average yield during the preceding fiscal year on interest-bearing marketable securities of the United States which, at the time the computation is made, have terms of 15 years or more remaining to maturity (average yield is rounded to nearest one-eighth percent); and (2) provide that the rate shall not be raised or lowered more than one-quarter of 1 percent for any year. The Treasury Department calculated the specified average to be 7.58 percent. Rounding this average yield to the nearest one-eighth percent is 7.625 percent, which is within the permissible one-quarter of 1 percent change.

The rate of 7.625 percent shall be used by all Federal agencies in the formulation and evaluation of water and

related land resources plans for the purpose of discounting future benefits and computing costs or otherwise converting benefits and costs to a common time basis.
